## DETAILED ACTION

### *Double Patenting*

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-41 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over:

(a) claims 1-47 of U.S. Patent No. 6,440,551 (ENNISS ET AL); or

(b) claims 1-30 of U.S. Patent No. 6,699,578 (ENNISS ET AL);

in view of OLIVER ET AL (US 4,797,317).

The ENNISS ET AL patents each claim the recited color corrected film, the method of making said film, and other claimed features except for the metallized layer.

OLIVER ET AL discloses that it is well known in the art to apply thin metal layers having a typical thickness of 140 angstroms or less to colored transparent PET films, wherein the metal is stainless steel or nickel alloys, and wherein said metal is applied by means of

conventional vacuum deposition in order to control the degree of light transmission in glazing applications such as glass windows.

It would have been obvious to a person of ordinary skill in the art at the time the invention was made to metallize the films claimed in the ENNISS ET AL patents in order to modify and adjust the optical properties (e.g., transmission, reflectivity, etc.) of the films for specific glazing applications.
